 Project Address: _____

SPECIAL INSPECTION AND TESTING AGREEMENT

In accordance with the Oregon Specialty Structural Code (OSSC) 107.1, the Registered Design Professional (RDP) shall prepare and submit a special inspection and structural observation program. The RDP shall confirm that the special inspection and structural observations noted below are indicated on the approved plans. This agreement is meant to denote general areas of construction requiring special inspection. Reference the approved plans for more specific requirements related to each respective area.

Per OSSC 1704.2, the Building Official may accept all special inspectors registered with the Oregon Building Officials Association (OBOA) Special Inspection Program for the type of work for which they are certified/qualified to inspect.

The Special Inspector shall observe and document the work for conformance with the building department approved plans and specifications and applicable workmanship provisions of the OSSC. Additionally, the special inspector(s), general contractor, owner and RDP shall comply with the duties and responsibilities outlined in Appendix D of the OBOA Special Inspection Program. Appendix D is available upon request or can be viewed at www.oregonbuildingofficials.com.

The following special inspections, material testing and structural observations shall be performed according to OSSC Chapter 17 unless a separate program of inspection is submitted by the RDP and approved by the Building Official.

BEFORE A PERMIT CAN BE ISSUED: The RDP shall complete Part 2 of this agreement and verify all non- jurisdictional acknowledgements in Part 3 are completed.

PRIOR TO RECEIVING FINAL INSPECTION: The Special Inspector or Inspection Agency and the RDP shall submit a Final Summary Report to the Building Official. The summary shall include a statement that all items requiring special inspection, testing or structural observations were fulfilled, reported and, to the best of their knowledge, in conformance with the building department approved plans, specifications, approved change orders and applicable workmanship provisions of the OSSC.
